Excursion to the lake Tolmachyovo, 1 day

The lake Tolmachyovo is one of the most beautiful lakes in Kamchatka. It is situated in the south-western part of Kamchatka on the height of 616 m above the sea-level. Tolmachyovo – a deep and very cold lake. Its surface area is a bit more than 15 square kilometers; its deepest point is 60 meters. Turquoise water surface and emerald woods will never leave you indifferent. Waterfalls, situated not far from the lake, bring a romantic feeling in the air. The beaches of the lake are formed by pumice deposits, and in the coastal sand it is possible to find pieces of volcanic glass – obsidian.

The sedentary form of the salmon - Kokanee is found in depths of the lake. Here one can watch waterfowl nesting on the coasts. Bears and other predators come here to hunt. Besides, the area of the river and Tolmachyovo lake is one of the most important places of reproduction of a valuable species of a noble salmon – rainbow trout.
