## Excursion to the Malkinskiye hot springs, 1 day

130 km from Petropavlovsk-Kamchatsky, next to the ancient settlement Malka, there are two groups of mineral springs – cold carbonic one and hot one. Every year the number of people who admire the nature, attracting here by these springs and by the beauty of surroundings, increase.

The springs are located in the west of the settlement Malka on the bank of the river Kluchevka (left stream tributary of the river Fast), quite powerful hot water streams of 70-80°C break through the layer of pebbles. Dug shallow spacious basins – baths are the best place to get warmed up and to have a rest in curative low-mineralized thermal waters.

On the other bank of the river there is a carbonic mineral spring where a new mineral water plant has been built.

You will have a short excursion to «wild» thermal springs where you will have a chance to take a natural hot bath and to watch the hot springs almost adjoin with cold river passing by; the mountaineering landscape of the territory – the chain of the most beautiful and sharp tops which has never been ascended by a man – will bring an inexhaustible source of picturesqueness and variety of beauty to your trip.
