## Helicopter excursion to the Hodutkinskiye hot springs, 3-4 hours

*In one of the most beautiful places in Kamchatka – in the hollow between two extinct volcanoes Priyomysh and Hodutka – there are the Hodutkinskiye hot springs. The water flowing out from many mud springs gathers in one creek. Everywhere on the glade springs blow in and that's why the creek fills with water and becomes a river up to 30 meters in width and 1.5 meters in depth. The water in the river consists more than 90% of thermal waters. The temperature of the water is 44-88 °C, and down the stream it is possible to find the most suitable and comfortable temperature for bathing.*

*Here one can see a big-horn sheep, a brown bear, a black-billed capercaillie here; it is possible to watch a migration of swans, geese and ducks as well. These springs are suitable for bathing all the year round.*

**Difficulty:** easy

**Duration:** 3-4 hours

**The number of people in a group:** 18-22

**Meeting of a group:** verify a day prior to the departure

**The meeting time:** 10:45 a.m.
