Jeep tour to the caves of the Gorely volcano, 1 day

About 2 000 years ago during the eruption of the volcano Gorely a lava stream created wide stone fields to the north of the volcano. Ancient lava of the Gorely volcano was very liquid. They had time to harden on the top, but under the crust the lava continued to flow. As the result a huge tube was formed, the lava flew out and the remained walls created lava caves. The biggest size of the territory with caves is 1.5 km, while the total length of the stream is 15 km. The longest cave is 140 m and the shortest is 16 meters. High, wide and open grottos are the result of destroyed caves, and there are a lot of them on the volcano Gorely. 6 caves are reachable. A part of the caves which we offer to you to see is not so big but it is absolutely amazing! It has a domelike vault. The bottom of the cave is covered with ice crust all the year round. You will have a chance to see such beauty and to feel "real" breathing of earth.

The period of the tour: july-september

Kind of the tour: by car and on foot

Duration: 1 day

The meeting place: Bus station (10 km.)

The meeting time: 07:55 a.m.
