## Jeep tour to the foot of the Avachinsky volcano, 1 day

*The volcano AVACHINSKY is the most active volcano in the Koryaksko-Avachinskaya group of volcanoes and represents difficult double type of a volcano like Somma-Vesuvius. Travelers all around the world fascinate the terrific likeness with the legendary volcano Vesuvius – the responsible for the crush of Pompeii.*

*The natural sanctuary «Camel», situated in the pass between the Avachinsky and the Koryaksky volcanoes, is a small rocky massif with two sharp tops. This mountain was formed after the eruption of the Avachinsky and the Koryaksky volcanoes. Due to the movements of earth crust in the period of the volcanic activity, a giant fissure was formed out of where hot lava had been flowing, and later it created the mountain Camel. From the top of the mountain there is a great view of the town. The Avacha bay and the Viluchinsky volcano.*
